Per-user decode speed (tokens/s/user)
Qwen3.8-27B Unsloth GGUF UD-Q4_K_XL | 1 RTX PRO 6000 Server Edition | labels: requested client concurrency
AgentX x: reported per-user decode rate. y: raw request-span output throughput.
Progress view: measured points only; missing concurrencies remain unmeasured. Whiskers: observed repeat range, not confidence intervals.
